Summary

Entry-level engineer with a strong focus on AI and NLP, with hands-on experience building intelligent systems using Large Language Models (LLMs). Skilled in prompt engineering, semantic evaluation, and developing scalable workflows for real-world applications, with a growing research interest in AI-driven system design and model evaluation. Experienced with Angular, Node.js, and MongoDB, with a focus on building scalable solutions and integrating intelligent features into real-world applications.

Education

Amrita Vishwa Vidyapeetham
Master of Computer Applications (MCA)

07/2024 – present
Amritapuri, Kerala

Bangalore City University
Bachelor of Computer Applications (BCA) – CGPA: 7.09/10

2020 – 2024
Bangalore, Karnataka

Technical Skills

- Programming & Scripting:** Python, Java, C, C++
- AI & Machine Learning:** LLM Integration, Prompt Engineering, Model Evaluation
- Frameworks & Libraries:** FastAPI, Node.js, Express.js
- Web & Frontend:** HTML, CSS, JavaScript, Angular
- Databases:** MySQL, MongoDB, PostgreSQL
- Tools & Version Control:** Git, GitHub

Projects

LLM-Based Activity Diagram Generation & Extraction | *Python, LLMs, Vision-Language Models* 2025-2026

- Developed a generation module using LLMs to convert natural language requirements into UML activity diagrams.
- Built an extraction module using Vision-Language models to derive structured workflow information from diagram inputs.
- Handled complex workflows including loops, concurrency, and conditional flows.
- Evaluated model performance using custom semantic and structural metrics for accuracy.
- Built a scalable solution for processing real-world requirement inputs.

Healthcare Portal with ML-based Parkinson's Detection | *Angular, Node.js, MongoDB*

2024

- Designed and developed a full-featured hospital management system with a user-friendly interface.
- Implemented modules for patient records, appointment scheduling, and admin-staff coordination.
- Integrated a **machine learning**-based Parkinson's disease detection feature using biomedical input data.
- Utilized a database management system to ensure secure and efficient data storage and retrieval.

Internships

Wissen Infotec | *April 2026 – present*

- Developing backend services and RESTful APIs using FastAPI and PostgreSQL for scalable application architecture.
- Designing and optimizing backend logic to support automation and efficient data processing workflows using LiteLLM.

Publications

Comparative Structural and Semantic Evaluation of Fine-Tuned Large Language Models for UML Activity Diagram Generation | *ICSSAS 2026 (IEEE Co-sponsored Conference)* 2026

- Built an AI-based approach for automated UML activity diagram generation from textual requirements.
- Performed comparative analysis of fine-tuned LLMs using custom structural and semantic evaluation metrics.

Certifications

- Software Engineer Intern Certification – HackerRank (2025)
- React.js AI Chatbot with ChatGPT, Gemini and DeepSeek – Udemy (2025)

Additional Information

- Soft Skills:** Adaptability, Teamwork, Communication, Problem Solving
- Interests:** Artificial Intelligence, NLP & LLM Research, Intelligent Systems, Software Development
- Languages:** English (Read/Write/Speak), Malayalam (Read/Write/Speak), Hindi (Read/Speak), Tamil (Speak)
